DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-27 are rejected under 35 U.S.C. 102(b) as being anticipated by
Dean et al (US 4,353,313).

Dean et al discloses a structure for a rail car body and a method of manufacturing the body. The body comprising a first a First plate D1 on one side of a passenger doorway. The first plate is mirrored by a third plate D2 that is on the opposite side of the doorway. Both plates are welded to the side walls of the rail car by having bent flanges 78, 79 on the outer edges of the plates. The flanges are then fastened to the outer wall. A second plate D3 is mounted above plates D1 and D3, plate D2 also has a bent flange at the top and is welded to the roof of the structure. Plate D2 is also welded to the tops of plates D1 and D3.

Response to Arguments

Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dean (US 3,151,574), Eggert, Jr. (US 4,211,173) and Ishida et al (US 5,458,066) all disclose types of constructions for rail car bodies.
